

## Financial Management Course Description

### Economic Faculty

**Study program:** Professional Master in Business Administration

**Course Title: Financial Management**

**Course Credits: 7 ECTS**

**Language of Instruction:** Albanian

**Course Description:** Financial Management is concerned with economic analysis applied to the business decisions of firms. Financial managers must acquire and use funds in order to maximize the value of the tangible and intangible assets of the firm. Corporate Finance has three main areas of concern: capital budgeting, capital structure and working capital management.

*Key Concepts:* Finance; Corporate Finance; Financial markets; Financial Statements; Time value of money; Investments; Return and Risk; Bond Valuation; Stock Valuation.

**Course Goals:** By the end of the course you should be able to:

- Explain the theoretical foundation that guide all financial decision making, shareholder wealth maximization. You should also be able to recognize agency problems in business situations.
- Make investment decisions based on projected cash flows, the timing of the cash flows and the risk of the cash flows. This valuation approach is a key to financial thought.
- Describe various financial processes such as issuing securities and paying dividends and discuss the implications to the firm.
- Read intelligently the business press as it describes business financial problems and successes.

### Course Requirements:

During this course, students will discuss multiple choices, homework, exercises and case studies. Every student is encouraged to be active in the seminars and to follow the lessons.
