

Course Description

Faculty: Educational Sciences

Study program: Professional Master in Teaching

Course Title: Research methods in education and research seminar for the preparation of microthesis

Course Credits: 5 ECTS

Language of Instruction: Albanian

Course Description: In this course, students will gain knowledge about the research process in the educational sciences. This program is conceived with two phases that are organically connected to each other: the first is about essential information for designing scientific research and enabling students to become "critical readers" of scientific articles, analyzing their constituent parts of theirs. The second has to do with the realization of a scientific task by them. All work will be finalized by presenting an independent or group research assignment, where students will define the reasons for choosing the topic, the methodology selected, the data collection techniques and the instruments used for data collection, analysis and their elaboration, and the final writing of the research task and finally the presentation of the task will be done in PowerPoint.

Course Goals: To enable students to become "critical readers" of scientific articles and to write a scientific paper on their own.

Course Requirements:

Participation in seminars
Individual poster presentation
Power point presentation in group

Grading:

Seminars: 10 %
Individual/group assignments & Presentations: 30 %
Final Exam: 60 %

Course Schedule:

Two lectures per week.
One seminar per week.
Lectures are optional.
Seminar attendance is 75%.
